

ONE PROJECT INSIDE

Ver.5.1

Anyone can use it to help them clean up their desk space
and concentrate on work by using the simple rule of
sorting all related documents for each project into one place.

About

A Document box which organizes everything by project.

Proposals, drafts, reference materials, estimates, business cards, receipts, etc - organize your desk by gathering together all materials related to a project, no matter its size. It is a work tool which enables you to focus on your work.

How to Use

1 Decide the title

Let's decide "where it belongs to" for papers and small articles which tends to be scattered in a busy schedule.

First, writing the title on the cover or the binding of "WORKERS'BOX" is the start point.

2 Organize everything

Next, throw in everything - no matter the size or width but whatever is related.

Knowing where they are is enough and no need to classify in detail.

3 Place like books

Lining them up like books on a shelf, it is easier to take them out and find them.

Let's put ones which you need to take out often near the desk and ones which you want to store on the shelf.

Detail 1

Organize all documents related to a project.

Big enough to store A4 size clear document holder.

Binder that can set documents you reference.

Pocket that can store business cards and receipt.

Store a few A3 size documents without creases.

Inside is matte black.

Detail 2

Write the title, schedule, and progress directly.

The right-opening style, like a book, allows for comfortable opening and closing.

There are two index columns, one on the spine and one on the bottom, which can be placed either vertically or horizontally according to the height of the shelf.

It is convenient to give a temporary title with masking tape if you cannot decide the title.

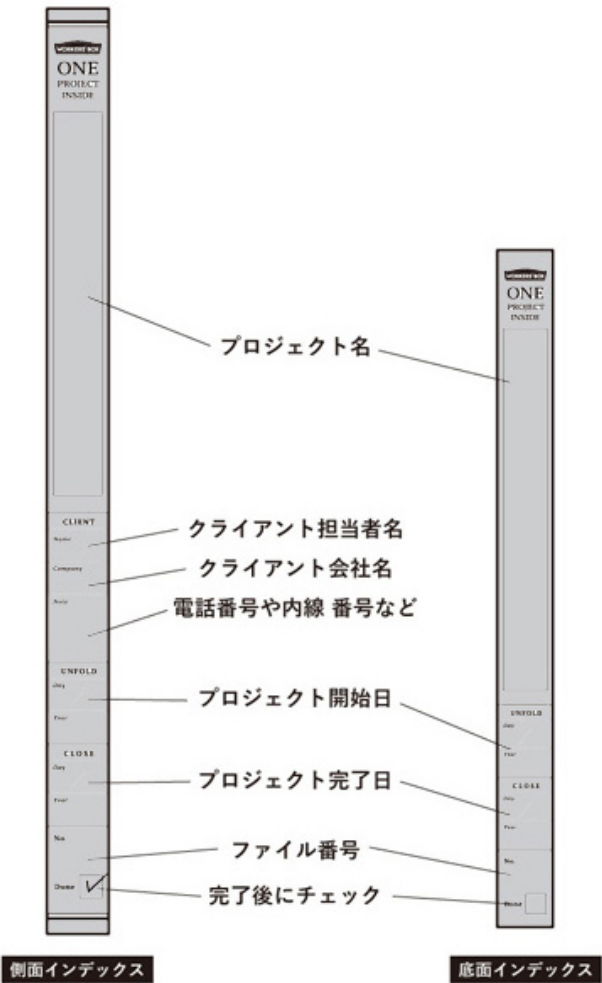

We have "WIDE" that is about three times thicker and can hold plenty of documents and accessories.

A dedicated stand which can group five together.
